Dear Jim:

Your letter concerning your meditation and the information about Ken and the decision-making he must encounter in connection with the Law of Karma certainly is helpful. I realize the apprehension you have for the reason that you were able to be shown first-hand quite a bit of the past history and its negative effects. You may be sure, however, that this time around there will be no repetition of that which happened long ago on Atlantis. Actually, day by day we are becoming more solid in our thinking and are breaking the yoke which actually was holding us somewhat in bondage.

I often think of that statement made by Franklin Roosevelt during the course of the great world depression. He said, "The only thing we have to fear, is fear itself." I think there is an awful lot of that in this situation. Personally, I am trying to be so positive, constructive and affirmative that I am building up constantly complete protection which cannot be alleviated in any respect by external forces. So as far as you are concerned, I am sure that you can charge the matter off as so much additional experience and certainly the outcome of it all is up to none other than Ken himself.

On another subject, I am sending you a complete description of the electronic and sound equipment which Helen saw and described. There are 27 pages of description and it would be interesting to know exactly what part Helen might have played in the original instance since she was shown all of this and given all of the Miracle material and then totally rejected it. It would be interesting also to know what usefulness this material is and whether it is a forerunner to an actual redesign of the equipment for use in our day. It would seem to me at this particular time that this equipment may even be on the drawing board stage but may be off some distance in the future before it could actually materialize. I am sure that our friends on the other side will be telling you more about this.
